Subject: RE: Bylaw Referral - Zoning Amendment - 16963 Old Richter Pass Road | A2022.015-ZONE
Attachments: subdivision-report-criteria-for-authorized-persons.pdf

Evening Ben,
The IH Healthy Community Development Team has received the above captioned referral from your agency. Typically we provide comments regarding potential health impacts of a proposal. More information about our program can be found at [Healthy Built Environment](#).

An initial review has been completed and no health impacts associated with this proposal have been identified. As such, our interests are unaffected by this proposal.

Please note that this response does not automatically confer Interior Health support for onsite services (e.g. sewerage disposal). Additional information will be required by the applicant during the Ministry of Transportation and Infrastructure subdivision process if the rezoning application is approved and proceeds. From the Soils and Lands perspective that the applicant will be required to meet our Subdivision Report Criteria for Authorized Persons at the time of subdivision per our review process. In other words, if they succeed in obtaining this amendment, IHA support is not guaranteed at the subdivision stage.

More information can be found on our public website at [Sewerage, Subdivisions & Healthier Industries | IH \(interiorhealth.ca\)](#). I've also attached our subdivision criteria for the applicant's awareness / reference.

If you have any questions, please feel free to email us back or call 1-855-744-6328 (Ext. 4).

Regards,

Mike Adams

Team Leader, Healthy Community Development

Interior Health

We recognize and acknowledge that we are collectively gathered on the traditional, ancestral, and unceded territories of the seven Interior Region First Nations, where we live, learn, collaborate and work together. This region is also home to 15 Chartered Métis Communities. It is with humility that we continue to strengthen our relationships with First Nation, Métis, and Inuit peoples across the Interior.

Subdivision Report Criteria for Authorized Persons

Interior Health's Healthy Built Environment (HBE) Team responds to referrals from the Approving Officer on the suitability of onsite sewage disposal for a proposed subdivision. The HBE team considers all aspects of appropriate disposal of sewage during the land development planning process, which can only be provided in a comprehensive report prepared by an Authorized Person (i.e. Professional Engineer and Geoscientists with background and experience in onsite sewage disposal; Registered Onsite Wastewater Practitioner with Planner designation).

The purpose of the Authorized Person's report is to demonstrate in writing AND on a site plan that there is suitable onsite sewerage dispersal areas for each proposed lot and that drinking water sources will be protected. Our assessment is typically based on sufficient area to contain a Type 1 trench based dispersal method for a 4 bedroom home (1,600 litres/day) to ensure the long term sustainability of the lot. Please contact the HBE Team to discuss assessment criteria for non-domestic proposals.

Note: Incomplete reports will delay/stop our review process until a complete report is received.

1. **The report must be submitted to the Approving Officer and contain ALL of the following information:**

- Date;
- Lot ID, Folio Number, Property Identification Number (PID), street address and general description;
- Owner contact info;
- Authorized Persons contact info;
- Other Agent's contact info (if applicable);
- All information outlined in the following sections (i.e. 2 and 3) below;
- Any general site info/current status to assist us with considering the proposal.

2. **Each proposed lot (new and remainder) must be assessed for ALL of the following criteria related to a suitable primary and reserve Type 1 trench dispersal areas, and ALL information is to be included in the comprehensive report. If any of these criteria don't apply, please clearly indicate/state this in the report:**

- A copy (or record) of the approval for any existing sewerage disposal systems. Assess and document functionality of existing systems and not posing a health or safety hazard. Systems that are no longer approved for use (i.e. seepage pits/dry wells etc) cannot be considered/included as a primary disposal area.
- Slope – show the slope of the lots and the slope within the proposed dispersal areas. The maximum slope is 15% for a Type 1 Trench system the discharge area;
- Water table – confirmation of seasonal high water table (may require assessment during spring freshet);
- Hydraulic loading rate (hlr) determined by:
 - a) Soil profile description, and vertical separation to minimum 1.2 metres of natural undisturbed soil (1.5 metres preferred, 2 metres in exceedingly fast soils);
 - b) Soil permeability (125-3000 kfs) / perc rate (0-60 min/inch);

- Breakout points - any potential down slope breakout areas within 15 metres of the edge of proposed discharge areas;
- Water - any watercourses (including seasonal), rivers, creeks lakes or drainage courses within 30 metres including the mean annual high water mark;
- Rock/limiting layer - within the top 1.2 metres;
- Floodplain - 20 year flood elevation;
- Wells – within 30 metres;
- Identify and provide copies of relevant covenants/easements/right-of-way – within 30 metres.

3. Include a scaled site plan (should be prepared by a BC Land Surveyor or Professional Engineer) showing ALL of the following information for EACH proposed lot under 2 Hectares:

- lot dimensions and area;
- elevation contour lines;
- terrain over 25% slope;
- flood elevation;
- location of proposed discharge areas showing setback distances on the proposed and adjacent properties from:
 - a) existing sewerage systems;
 - b) existing & proposed driveways, easements, covenants, no build areas, right of ways, service lines, etc.;
 - c) existing and proposed improvements (e.g. buildings, fences, swimming pools, animal pens);
 - d) existing and planned drinking water intakes/well sites for proposed lots;
 - e) existing well sites for neighbouring parcels;
 - f) all domestic and natural water sources;
 - g) breakout points.

4. Written Statement

The report **MUST** also include a written statement that the Authorized Person has reviewed all the above criteria and has identified two (2) suitable dispersal areas for each proposed lot (including for any remainders that are less than 2 hectares) that when used for on-site sewerage disposal will not create a health hazard. The report (including the site plan) must be signed and sealed by the Authorized Person.

Attachments: Bylaw Referral Sheet-A2022.015-ZONE.pdf

Hi Ben,

In response to the subject referral, please be advised that our program area within the Ministry of Environment and Climate Change Strategy doesn't comment on zoning bylaws.

Our focus is regulatory oversight/administration of Part 4 of the *Environmental Management Act* which deals with the identification, investigation and remediation of contaminated sites in BC.

All the best,
Alan
